

SMART BUS BOOKING SYSTEM FOR RWANDA

- Solve a Real-World Issue: Streamline the booking process to reduce terminal congestion and waiting times.
- Enable Digital Transformation: Transition from manual ticketing to an automated, mobile-based solution.
- Improve Service Quality: Provide real-time scheduling, seat availability, and booking confirmations.
- Support Operational Efficiency: Equip bus operators with tools for effective capacity and schedule management.

KEY DATABASE ENTITIES

- Users:
Profiles containing personal details, travel history, and payment information.
- Bus Terminals:
Details of terminal locations, operating hours, and associated bus schedules.
- Buses:
Information on bus fleets, seating capacities, and service routes.
- Bookings:
Records of ticket reservations, seat assignments, and transaction statuses.
- Routes & Schedules:
Data defining travel routes from Kigali to various destinations, including timing and frequency.

BENEFITS OF THE DIGITAL BOOKING SYSTEM

- Reduced Waiting Times:
- Online booking minimizes the need for physical visits to busy terminals.
- Enhanced Customer Experience:
- Users enjoy a seamless booking process with instant confirmations and notifications.
- Operational Efficiency:
- Bus operators can manage schedules, prevent overbooking, and optimize resource allocation.
- Data-Driven Insights:
- Real-time analytics on booking patterns and peak travel times to improve service planning.
